Session 1 — Student Activity Worksheet

Lecture 7 — Understanding Human Being as the Co-existence of the Self and the Body

Name	SHASHWAT KUMAR	**Reg. No.**	RA2511003011035
Branch	CSE-CORE/Q1	**Date**	30th August 2026

Session Learning Outcomes

By the end of this session, you should be able to:

- Explain the human being as the co-existence of the Self (consciousness) and the Body (material).
- Distinguish the need, activity and response of the Self from those of the Body.
- Describe the response of the Self as Knowing–Assuming–Recognising–Fulfilling, and explain why the response of the Body is definite while that of the Self is not always definite.
- Relate “assuming with knowing” to definite, self-organised conduct (swatantrata) and “assuming without knowing” to indefinite conduct (partantrata).

How to Engage with this Worksheet

- Whatever is stated here (and in the lecture) is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance, and validate it in your living.
- Treat each question as a dialogue: first between you and the material, and then within your own Self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- Human being = co-existence of the Self (consciousness) and the Body (material).
- Need — the Self needs happiness (e.g. respect): qualitative, a feeling, continuous in time. The Body needs physical facility (e.g. food): quantitative, required in limited quantity, temporary in time.
- Fulfilled by — the need of the Self by right understanding and right feeling (activity of consciousness); the need of the Body by physio-chemical things (material).
- Activity — the Self: imagination (desire, thought, expectation), continuous; the Body: e.g. eating, walking, temporary.
- Response = recognising the relationship with the other unit and fulfilling it. Response of the Self: Knowing, Assuming, Recognising, Fulfilling. Response of the Body: Recognising, Fulfilling (definite).

- The recognition and fulfilment of the Body is definite. The Self has a choice in recognising and fulfilling, and this choice is based on Assuming — accepting with or without knowing.
- Knowing through self-exploration → assuming becomes definite → conduct is definite (self-organisation, swatantrata). Preconditioning / assuming without knowing → assuming keeps changing → conduct is indefinite (dependence, partantrata).

Part B — In-Class Activity

Activity 1 — Self or Body? Classify the need / activity

For each item below, tick the column it belongs to and note the feature stated in the deck (continuous/temporary, qualitative/quantitative).

Item	Self / Body	Continuous or Temporary	Feature
Respect	Self	Continuous	Qualitative
Food	Body	Temporary	Quantitative
Imagination (desire, thought, expectation)	Self	Continuous	Activity of consciousness
Eating, walking	Body	Temporary	Activity of the Body
Happiness	Self	Continuous	Qualitative
Physical facility	Body	Temporary	Quantitative

Activity 2 — The "Loop" of gross misunderstanding

Slide 20 shows a loop. Complete the chain of equations that the loop assumes, then answer the check question.

- Human Being (Self, I) = _____Body_____
- Need (Respect) = _____Physical Facility _____
- Continuous = _____Unlimited_____
- Result of the loop: _____Unlimited accumulation_____ → _____ (deprivation)
- Check: Do you find yourself caught up in this loop? Write one observation.

Yes, I often observe myself attempting to earn respect or continuous satisfaction by accumulating material items, which ultimately leaves a feeling of deprivation rather than fulfillment.

Part C — Long-Answer Questions

Answer in your own words, verifying each point on the basis of your natural acceptance.

Q1. Explain the human being as the co-existence of the Self and the Body. Bringing out the need, activity and response, show how the Self differs from the Body. **[5]**

A human being is a co-existence of the Self (consciousness) and the Body (material). The Self requires happiness (e.g., respect), which is qualitative, continuous, and fulfilled by right understanding and feeling. The Body requires physical facility (e.g., food), which is quantitative, temporary, and fulfilled by physio-chemical items. The Self's activity (imagination) is continuous, while the Body's activities (eating, walking) are temporary.

Q2. What is meant by the “response” of the Self (Knowing, Assuming, Recognising, Fulfilling)? Why is the response of the Body definite while the response of the Self is not always definite? **[5]**

The response of the Self is Knowing–Assuming–Recognising–Fulfilling. The Body's response is definite because it operates only on Recognising–Fulfilling via material laws. The Self's response is not always definite because its recognition and fulfillment depend on "Assuming," which can be done with or without "Knowing".

Q3. Distinguish “Assuming with Knowing” from “Assuming without Knowing.” Using the deck’s examples, show how each leads to definite (swatantrata) or indefinite (partantrata) conduct. **[5]**

"Assuming with Knowing" is based on self-exploration and natural acceptance, leading to definite, self-organized conduct (*swatantrata*). "Assuming without Knowing" is based on preconditioning or external inputs, causing assumptions to change constantly, which leads to indefinite conduct (*partantrata*).

Q4. Slide 20 shows the loop: Self = Body, Respect = Physical Facility, Continuous = Unlimited — leading to unlimited accumulation and deprivation. Examine whether you are caught in this loop and write your observation. **[5]**

Equating the Self to the Body leads to assuming that qualitative needs like respect can be satisfied through quantitative physical facilities. Trying to fulfill a continuous need with material things creates an endless cycle of unlimited accumulation, resulting in continuous feeling of deprivation. Observing my daily life reveals that buying material goods provides temporary satisfaction but fails to ensure continuous respect or happiness.

Self-Reflection (Take-Home)

- How much of your time and effort goes into right understanding and right feeling, and how much into physical facility? (Slide 6)
- Take one recent decision and check: was your response based on assuming-with-knowing or assuming-without-knowing?

Prepared strictly from the lecture/practice-session slides (L7). UHV-II, Module 2 — Harmony in the Human Being.
