Session 3 — Student Activity Worksheet

Lecture 9 — The Body as an Instrument of the Self

Name	SHASHWAT KUMAR	**Reg. No.**	RA2511003011035
Branch	CSE-CORE/Q1	**Date**	30th August 2026

Session Learning Outcomes

By the end of this session, you should be able to:

- Explain that the transaction between the Self and the Body is only in the form of information (sensation from body, instruction from self).
- Describe the Self as central to human existence and the Body as its instrument.
- Explain the Self as Seer, Doer and Enjoyer (Experiencer).
- State the program of the Self and why production, protection and right utilisation of physical facility is less than one-fourth of it.

How to Engage with this Worksheet

- Whatever is stated here (and in the lecture) is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance, and validate it in your living.
- Treat each question as a dialogue: first between you and the material, and then within your own Self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- The Self decides how to fulfil its own needs as well as the needs of the Body.
- The transaction between the Self and the Body is only in the form of information: sensation (from the Body to the Self) and instruction (from the Self to the Body).
- I am; my body is; I want to live; my body is used as an instrument. I want to live with continuous happiness; physical facility is required for nurturing, protection and right utilisation of the body.
- Program of the Self = to understand harmony and to live in harmony, at all levels of being (individual, family, society, nature/existence), for continuous happiness. Production, protection and right utilisation of physical facility is a part of this program (less than one-fourth).
- The Self is the Seer (the one that sees / understands — the senses are only instruments; one can also ‘see’ within), the Doer (the one that decides what to do; the body is used to express the decision) and the Enjoyer / Experiencer (the one that feels happiness or unhappiness).

- FAQ points: the Self reads even ordinary sensations by choice; in extreme pain too it can respond rather than react. Mind is a part of the Self (imagination — desire, thought, expectation); the Brain is a part of the Body (it coordinates the body's activities). A continuous activity is of the Self; an activity that gets tired is of the Body. Memory is stored in the Self.

Part B — In-Class Activity

Activity 1 — Seer, Doer or Enjoyer?

For each situation, identify which capacity of the Self is acting, and note whether the body is used as an instrument.

Situation	Seer / Doer / Enjoyer	Is the Body used as instrument?
Concluding that the object in your hand is a pen	Seer	No
Deciding what to do and what not to do	Doer	Yes
Feeling enthused or depressed	Enjoyer	No
'Seeing' within that you are getting angry	Seer	No

Activity 2 — Information transaction

Between the Self and the Body, label the two forms of information and the direction of each.

- From Body to Self: _____Sensation_____ (this is called _____)
- From Self to Body: _____Instruction_____ (this is called _____)
- Therefore the Body is ____Instrument_____ of the Self, and the Self is _____central _____ to human existence.

Part C — Long-Answer Questions

Answer in your own words, verifying each point on the basis of your natural acceptance.

Q1. "The transaction between the Self and the Body is only in the form of information." Explain, naming the two forms. **[5]**

The Self and Body communicate exclusively via information exchange. The two forms are *Sensation* (information sent from the Body to the Self) and *Instruction* (information sent from the Self to the Body).

Q2. Explain the Self as Seer, Doer and Enjoyer, giving one example of each from the deck. **[5]**

The Self is the *Seer* (the one who understands/perceives, such as recognizing an object), the *Doer* (the decision-maker who chooses actions), and the *Enjoyer* (the entity that experiences happiness or sorrow from those choices).

Q3. State the program of the Self. Why is production, protection and right utilisation of physical facility less than one-fourth of the program? **[5]**

The program of the Self is to understand harmony and live in harmony across all four levels: individual, family, society, and nature/existence. Physical facility production, protection, and right utilization form less than one-fourth of this program because material needs apply only to bodily upkeep, leaving the majority of human existence focused on conscious relationships and understanding.

Q4. In the case of extreme pain, the deck says the Self reads the sensation “by choice” and can respond rather than react. Reflect on one instance and write whether you responded or reacted. **[5]**

In cases of severe pain, the body presents a physical sensation, but the Self chooses whether to read it with reactivity or conscious response. Choosing to remain calm and seek medical help reflects a conscious response, whereas panicking represents a reaction to bodily sensation.

Self-Reflection (Take-Home)

- Pick one activity of the Self (continuous, e.g. thinking) and one of the Body (which gets tired) from your day. (FAQ, Slide 27)
- Where do desire, thought and expectation take place — in the mind (part of the Self) or in the brain (part of the Body)? (FAQ, Slide 25)

Prepared strictly from the lecture/practice-session slides (L9). UHV-II, Module 2 — Harmony in the Human Being.
