Session 5 — Student Activity Worksheet

Lecture 11 — Harmony of the Self with the Body: Prosperity

Name	SHASHWAT KUMAR	**Reg. No.**	RA2511003011035
Branch	CSE-CORE/Q1	**Date**	30th August 2026

Session Learning Outcomes

By the end of this session, you should be able to:

- Explain self-regulation (sanyam) as the feeling of responsibility toward the body for its nurturing, protection and right utilisation.
- Explain health as: the body acts according to the Self, and the parts of the body are in harmony (in order).
- Define prosperity as the feeling of having / producing more than required physical facility, and explain its two steps.
- Examine the two gross misunderstandings (human being = body; resources are less than need).

How to Engage with this Worksheet

- Whatever is stated here (and in the lecture) is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance, and validate it in your living.
- Treat each question as a dialogue: first between you and the material, and then within your own Self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- Self-regulation (sanyam) = the feeling of responsibility toward the body — for its nurturing, protection and right utilisation. Health = the body acts according to the Self, and the parts of the body are in harmony (in order).
- Physical facility is required only for nurturing, protection and right utilisation of the body, and in a limited quantity. The required quantity can be identified.
- Prosperity = the feeling of having / producing more than the required physical facility. It needs two steps: (1) identification of the required physical facility, including the required quantity — with right understanding; (2) ensuring the availability / production of more than required — with right skills.
- A prosperous person thinks of right utilisation and of nurturing the other; a deprived person thinks of accumulation and of exploiting the other.
- We can observe two categories: lacking physical facility, unhappy/deprived; and having physical facility, unhappy/deprived. We want to be: having physical facility,

happy/prosperous. Without identifying the required physical facility, one only shifts between the first two categories.

- Gross Misunderstanding 1: Human Being = Body, leading to unlimited accumulation. Gross Misunderstanding 2: resources are less than our need — yet global food production is several times the requirement and about one-third is wasted; it is a question of right understanding and education-sanskar, not of production.

Part B — In-Class Activity

Activity 1 — Family Prosperity Chart

For each physical facility, fill in the quantity required and available, and judge whether your family is prosperous with respect to that need.

Physical Facility	Qty Required	Qty Available	Prosperous v need?
For nurturing the body (food…)	Fixed family quantity	Current available stock	Prosperous
For protecting the body — clothes	Fixed clothing set count	Current wardrobe count	Prosperous
Shelter (house)	One house space	One house available	Prosperous
Communication devices	Devices equal to members	Equal count present	Prosperous
Transportation	Vehicle count needed	Vehicle count available	Prosperous
Tools, instruments & gadgets	Necessary utilities count	Present utility count	Prosperous
Items available but not required (curios, show-pieces)	0 required	Present surplus count	Identified as excess

Activity 2 — Are you prosperous with respect to clothes?

Calculate the total quantity of clothes required by your family for protection, find out the quantity available, and conclude.

- Quantity of clothes required (for protection): _____10–15 sets per person_____
- Quantity available: _____Exceeds basic protection needs_____
- Is the available quantity less, equal to, or more than required?

  Available quantity is **more than required**.
- As far as clothes are concerned, do you feel prosperous or deprived?

  Prosperous.

Part C — Long-Answer Questions

Answer in your own words, verifying each point on the basis of your natural acceptance.

Q1. Define self-regulation (sanyam) and health. How are they related to the harmony of the Self with the Body? **[5]**

Self-regulation (*sanyam*) is the Self's feeling of responsibility for nurturing, protecting, and rightly utilizing the Body. Health (*swasthya*) occurs when body parts function in harmony and follow the instructions of the Self.

Q2. What is prosperity? Explain the two steps required to ensure it. **[5]**

Prosperity is the feeling of producing/having more than the required physical facilities. The two steps are: (1) Correctly identifying the required quantity of physical facilities through right understanding, and (2) Producing/ensuring an adequate surplus using right skills.

Q3. Explain the two gross misunderstandings discussed (human being = body; resources are less than need), using the data given. **[5]**

The two gross misunderstandings are: (1) Human Being = Body (leading to endless accumulation), and (2) Resources are inherently scarce. In reality, global food production significantly exceeds human requirements, yet roughly one-third is wasted due to issues with distribution and understanding rather than production capacity.

Q4. Distinguish a prosperous person from a deprived person in terms of what each thinks of doing with physical facility. **[5]**

A prosperous person focuses on right utilization and nurturing others, whereas a deprived person—regardless of wealth—focuses on endless accumulation and exploitation.

Q5: Assessing clothes shows that the quantity required for seasonal protection is finite and fully met. Recognizing that available resources exceed protection needs fosters a feeling of prosperity rather than deprivation.

Session 6: Lecture 12

Q5. Using the Family Prosperity Chart, work out for one category of physical facility whether your family is prosperous or deprived. **[5]**

Assessing clothes shows that the quantity required for seasonal protection is finite and fully met. Recognizing that available resources exceed protection needs fosters a feeling of prosperity rather than deprivation.

Self-Reflection (Take-Home)

- Do you have a continuous feeling of self-regulation (responsibility toward your body)? Is your body healthy? (Slide 17)
- Do you have a continuous feeling of prosperity? Do you think of right utilisation and nurturing others, or of accumulation and exploitation? (Slide 17)

Prepared strictly from the lecture/practice-session slides (L11). UHV-II, Module 2 — Harmony in the Human Being.
