21LEM202T — Unit 5, Session 4, SLO 2

Part B — In-Class Activity

Activity 1: Complete the proposal from the lecture.

Statement	Complete / Answer
Comprehensive human goal is conducive to	**human welfare — the wellbeing of all**
A holistic model of living is people-friendly and	**eco-friendly**
A people-friendly and eco-friendly model is therefore	**sustainable**
Right understanding helps us visualise	**the comprehensive human goal**

Activity 2: Name the four parts of the cycle and their role.

Part of Human Tradition	Role / What it ensures
Humanistic Education	**develops the competence to live with definite human conduct**
Human Conduct	**ensures living in accordance with human values**
Universal Human Order	**ensures humanistic education for the next generation**
Human Constitution	**provides the inner foundation for definite human conduct**

Activity 3 – Entry Point and Continuity

Tick the correct option and write one reason.

Question	Answer
Entry point for humanistic tradition	**Human Education**
Why is it the entry point?	**Because right understanding and values are first cultivated through education, which then shapes human conduct and constitution.**
How is continuity for next generation ensured?	**By passing on right understanding and humanistic values through education and living by example, ensuring the next generation internalizes them.**

Part C — Long-Answer Questions

1. Explain how right understanding enables the visualisation of the comprehensive human goal. (5 marks)

Right understanding of the self and the harmony at all levels (individual, family, society, nature) allows one to clearly see the comprehensive human goal: happiness, prosperity, continuity of society, and co-existence with nature. It removes confusion and contradictions in one's desires, enabling a holistic vision of what is truly fulfilling for all. Without right understanding, one's goals remain fragmented and self-centered, failing to encompass the well-being of others and nature.

2. Describe the humanistic tradition cycle. Why is humanistic education called the entry point? (5 marks)

The humanistic tradition cycle is: right understanding → right feeling → right thought → right behaviour → right work → mutual fulfilment in relationships → prosperity in family → fearlessness in society → co-existence with nature. Humanistic education is called the entry point because it is the first step that imparts right understanding, which then initiates the entire cycle. Without education that fosters right understanding, the subsequent stages cannot be properly realized.

3. “A humane society is people-friendly and eco-friendly.” Explain this statement using the lecture ideas. (5 marks)

A humane society is people-friendly because it ensures mutual fulfilment in relationships, trust, respect, and fearlessness among all individuals. It is eco-friendly because it recognizes the interconnectedness of human beings with nature and promotes sustainable living, minimal exploitation of resources, and co-existence with all elements of nature. The lecture emphasizes that right understanding leads to harmony within oneself, with others, and with nature, making a society both people-friendly and eco-friendly.

4. Take one feature of present education or professional life and suggest how it can be made more humanistic. (5 marks)

One feature of present education is the heavy emphasis on competitive exams and rote memorization. It can be made more humanistic by incorporating value education, group learning, and projects that foster cooperation, empathy, and understanding of real-world problems. Instead of ranking students solely on marks, assessment could include their contribution to the well-being of peers and community, thus developing right understanding alongside skills.

Self-Reflection (Take-Home)

In my own education, what is being developed more: skill, physical facility, or right understanding?

Which one change can help my classroom or institution become more people-friendly?

How can my future profession contribute to a humane society rather than only livelihood?

In my own education, skill and physical facility are being developed more than right understanding. One change that can help my classroom become more people-friendly is to include regular group discussions on ethical dilemmas and community service projects. My future profession can contribute to a humane society by prioritizing service to others, ethical practices, and sustainable solutions over mere profit, thereby fostering trust and well-being in the community.
